DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- 2. Claims 9, 27, 30 and 32 are rejected under 35 U.S.C. 102(b) as being anticipated by Gulati et al. (4,629,657).
- 3. The applicants claim a film having a first biaxially oriented polymeric film layer, an adhesive layer which bonds the first layer to a paper substrate and a second polymeric layer on said first layer (or on the opposite side).
- 4. The resulting structure would have the following arrangement: second layer (1)/ first layer (2) / adhesive layer (3) / paper layer. The examiner notes that in this structure a three-layer biaxially oriented film adhered to a paper substrate would meet the claimed structure.
- 5. Gulati et al. teach three-layer polymeric films having a top layer (comprising ethylene acrylic acid copolymer EAA) (corresponding to 3), an intermediate layer (comprising polypropylene) (corresponding to 2), and the bottom layer (comprises a material from the group consisting of copolymers of ethylene and an unsaturated carboxylic acid, especially ethylene acrylic acid copolymer, copolymers of ethylene and propylene, copolymers of ethylene and vinyl acetate, or ionomers of ethylene and methacrylic acid.), (corresponding to 1) (column 2, lines 16+).

Application/Control Number: 09/967,302

Art Unit: 1773

6. The films are formed by coextrusion followed by orientation (column 2, lines 57+).

While the surface layers may be uniaxially oriented this is an alternative embodiment

- 7. Regarding claim 27, the prior art teaches ethylene / propylene copolymers and the applicants claim polyethylene or polypropylene. Ethylene / propylene copolymers having an ethylene content of greater than 50% are polypropylene, those having a polypropylene content of greater than 50% are polypropylene.
- 8. Regarding claim 30, paper is a cellulosic material.
- 9. Regarding claim 32, the top layer is bound to paper and used in packaging applications (column 1, lines 36+; column 1, lines 12+).

Claim Rejections - 35 USC § 103

- 10. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- 11. Claims 28, 29 and 31 rejected under 35 U.S.C. 103(a) as being unpatentable over Gulati et al. (4,629,657).
- 12. Regarding claims 28 and 29, it would have been obvious to one having ordinary skill in the art to have printed either the paper or the polymeric film used in Gulati et al. for use in packaging applications so that the contents of the package could be identified.

Page 4

Application/Control Number: 09/967,302

Art Unit: 1773

13. Regarding claim 31, it would have been obvious to one having ordinary skill in the art to

have used paperboard or bleached paper in the structures taught depending on the end use of the

laminated structure.

Response to Arguments

14. Applicant's arguments with respect to claims 9 and 27-32 have been considered but are

moot in view of the new ground(s) of rejection.

Conclusion

Any inquiry concerning this communication or earlier communications from the

examiner should be directed to D. Lawrence Tarazano whose telephone number is (571)-272-

1515. The examiner can normally be reached on 8:30 to 6:00 (off every other Friday).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's

supervisor, Carol Chaney can be reached on (571)-272-1284. The fax phone number for the

organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent

Application Information Retrieval (PAIR) system. Status information for published applications

may be obtained from either Private PAIR or Public PAIR. Status information for unpublished

applications is available through Private PAIR only. For more information about the PAIR

system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR

system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
